SQLAlchemy and SQLite Basics

ComicCraft – AI Comic Story Creator using Gemini Models

Source support

The supplied ComicCraft document does not describe SQLAlchemy or SQLite implementation details. They are not part of the documented core workflow in the project description.

Related project context

The document mentions future enhancements such as user profiles and comic libraries. A database could support such features, but the supplied source does not specify a SQLAlchemy/SQLite design.

Important distinction

Do not treat database functionality as already implemented in the current ComicCraft version based on this document.

Current documented focus

The documented application focuses on prompt input, AI story generation, image generation, layout building, preview, and PDF export.

Source basis: uploaded ComicCraft project document.
