Environment Setup (pip, virtualenv, or conda)

ComicCraft – AI Comic Story Creator using Gemini Models

Purpose

A virtual environment keeps project-specific packages isolated from system-wide installations.

Create environment

```
python -m venv comiccraft-env
```

Activate on Windows

```
comiccraft-env\Scripts\activate
```

Install libraries

```
pip install fastapi uvicorn jinja2 python-multipart google-generativeai diffusers transformers fpdf Pillo
```

Environment variables

The deployment section recommends storing sensitive values such as GEMINI_API_KEY and HF_API_KEY in environment variables or a .env file loaded with python-dotenv.

Run the project

```
uvicorn app.main:app --reload
```

Source basis: uploaded ComicCraft project document.
