Uvicorn ASGI Server

ComicCraft – AI Comic Story Creator using Gemini Models

Overview

Uvicorn is the server used to launch the FastAPI application locally.

Start command

```
uvicorn app.main:app --reload
```

Local access

After the server starts, the application is available at http://127.0.0.1:8000.

API documentation

FastAPI's interactive documentation is available at http://127.0.0.1:8000/docs.

Testing

The documentation can be used to test endpoints such as /generate-comic/json, /generate, /export-success, and /test-image.

Source basis: uploaded ComicCraft project document.
